EMPORIA, VA., April 13.—After a careful microscopical examination of the so-called Hearst parasite, a local politicoscientist emphatically avers that it is neither aerobic or averobic, consequently it is barmless in all respects, and that it resembles in a great measure the bacilius aerogenus capsulatus—a gas forming microbe.

Fluctuations in Union Pacific Cause of Unsettled Condition of the Whole Market.

#### WHEAT SOMEWHAT STRONGER

Reports Show Extremely Large Export of Steel Products for March—Cotton Steady.

(By Associated Press.)
NEW YORK, April 13.—The dell and uncertain stock market of to-day was the natural outcome of the course of the previous market. The rather violent break in Union Pacific, with which the market closed yesterday, was regarded to-day as due to a raid. The more careful consid-eration of the part taken by the Attorneydue to a raid. The more careful consideration of the part taken by the Attorney-General in the Norhern Securities proceedings at St. Paul modified the first impression that the government was opposing liself on principle to the Union Pacifics effort to recover its former hoadings of Northern Pacific. The speculative basis for the recent movement in Union Pacific and the problematical our come of the factors in the speculation caused misgivings. The uncertainty thus saused and reflected in the hestiating fuctuations. In Union Pacific unsettled the whole market. The influence of foreign markets was also on the side of reaction, and there was fears that the Russian market was fears that the Russian market might result in further depression in the Paris market. The cancellation of an option on 67,00 tons of pig from by the United States Steel Corporation, and the reason given that it was feared that the purchase would invite the resimption of blast furnaces, was not of reassating effect on sentiment regarding the from and steel trade. Renewed strength in the wheat market pointed to vesterday's weakness as due to profit aiding on the government report. On the other hand, reports were current of a large export of steel products for March and the very pressed by the Iron Age and published near the close, had an important influence in railying the market. So did the increase in the dividend on Reading second preferred, which gave point to the reports of large accumulations of anthracile at the reduced apring price schedule. The failure of a threatened bear demonstration to appear prompted some covering was firm. The duliness of the trading was practically unrelieved to the close, Bonds were irregular. Total sales, parvalue, 1,550,000. United States new 4s anvanced 1-5 per cent on call.

The total sales of steeks for the day were 333,200 shares.

COTTON MARKETS.

NEW YORK, April 13.—The cotton market opened steady at a gain of 19929 points. The opened steady at a gain of 19929 points. The initial lowest were in sympathy with the lower cables, but after the call the list was advanced by covering to about list night's fluid prices with some little buying for long account, attracted by reports of frosts in some sections of the beit. The forecast, however, was for warmer weather, and while recepts continued very light, there was soon a renewal of bear pressure, said to be from Wall Street interests, and the metiket began to sag off with runnors circulating that a good sized New Orleans interest was being guined for. As prices worked downward the market became more active, and it looked as though considerable long cotton was coming on the market with the result that by the carly afternoon prices had been driven down a little over 30 points on the active months. Fellowing that there was a slight rally on covering and builties wires from New Orleans, where it was said one of the market leaders was bidding for large blocks of July. The recovery of a few points was soon lost, however, under continued short solling, and May in the late trading was down to £150, with July selling at it 18, bet losses of a little over half a cent. Just before the close the market rallled about 7 points on room covering and was shally steady at a net decline of £1545 points, with snies of 50,000 bules, according to estimated. The new crop months held related to the points with snies of 50,000 bules, according to estimated. The new crop months held related to the points with snies of 50,000 bules, according to estimated. NEW ORLEANS, LA., April 12.—COTTON—In the spot cotton market there was a fair demand, but offerings were light. Sales 3,890 hales, including 590 to arrive and 2,000 f. o. b. Quotations reduced 54c.

Futures opened steady with prices 259 points down. Liverpool was disappointing and New York was lower. At the opening a moderate amount of reiling orders were in evidence, which increased in volume until at the middle of the session they flooded the market and caused a sharp break of over a quarter of a cent. It was merely a case of manipulation by the bears. The movement was lisht, a fair spot demand was reported and cold weather continued in the cotton belt. Not the slightest attention was pald to any legitimate feature. The bea relement was in demand and they hammered prices with great success. In the trading May first lost 6 points from yesterday's close at 14.19, recovered to 14.21, declined to 14.10 and thaily recovered to 14.21, July showed similar fluctuations at the highest selling at 15.10 and at the lowest of 14.21, declined to 14.10 and thaily recovered to 14.24 points on the old crop positions and 12.916 on the new.
